The Voice in Action at Supply Chain 2020

RFBS would like to congratulate the organisers of the Supply Chain 2020, on their successful event, recently held in Melbourne for the first time.

Timothy Muir, Director at RFBS said; "The Supply Chain 2020 event, created the perfect opportunity for RFBS to showcase the latest technology and we wanted the chance to speak directly to the decision makers about their warehouse issues to ensure that our solutions matched and indeed exceeded their expectations."

RFBS had attended previous Supply Chain events held in Sydney and decided that this event was the perfect launch pad for the recent addition to their warehouse solutions, Vocollect Voice Directed Warehouses. With live demonstrations throughout the event in conjunction with their partners from Heavey RF, Ireland; the team was delighted to be able to spend so much time with the decision makers who attended the event.

Although, the numbers of attendees was smaller than anticipated, RFBS was able to do a more personalised demonstration of the advantages of voicing picking for companies in a busy, high output warehouse. The live demonstrations helped to demystify voice and displayed how its many uses in medium enterprises can increase efficiency, productivity and accuracy through its implementation.

The Vocollect voice picking demonstrations were well received during the event by both attendees and other exhibitors and RFBS look forward to the Queensland Supply Chain and Logistics Conference, 26-27 August, Brisbane, to give the opportunity for more companies to come and see voice in action.

For those not able to attend the event, RFBS are available to visit your warehouse and demonstrate both WMS and Voice solutions to find the right match for your needs. Call 1300 136 419.
